

The Master Plan

Rancho Los Labradores is much more than a simple country development. It is a different and unique concept that could be described through three great ideas: An exclusive Country Club, a Luxurious residential development and a Convenient Commercial Area enriched by a very special cultural touch.

These three elements give life to a "Community" formed by people that have the same beliefs in sharing, enjoying and learning about all the different chapters of life.

It is all about a dream that has come true, born from experience, and vast research about people's true needs and desires.

All of this has been brought to reality thanks to the great effort, hard work and love of the Cházaro Family, under the guidance of Mr. Sergio Cházaro Senderos.

A Luxurious residential development

Rancho Los Labradores, in its first phase, encompasses 45 beautiful home sites atop a gentle hill, offering breathtaking 360° mountain views and magical skies. Beautiful Mexican colonial-style homes each have a distinctive touch and own personality here. In the heart of the development is an "Oasis": an extensive green common area that includes 10 lakes interconnected by waterfalls that oxygenate and bring life to the aquatic ecosystem. Throughout this area, pedestrian walkways

and bridges create a peaceful environment. With its typical Mexican stoned streets and wide "adoquin" sidewalks, Rancho Los Labradores recreates an antique colonial village, offering all the advantages and commodities of the 21st century.

An exclusive Country Club

The human being is social by nature. This principle was the basis for creating a residential development with a very special Country Club. This social-cultural Club will offer typical services like: a tennis court, solar heated roofed and unroofed swimming pool, GYM and fitness area, and spacious green areas. But beyond the typical, activities are focused on cultivating the spirit and developing the hidden talents of every person. As an example, we will offer: painting courses, sculpturing workshops, reading and cinema-appreciation circles, yoga, tai chi, massage therapy, aromatherapy, temascal sessions, batik painting, salsa and tango lessons and more.

A convenient Commercial Area

Rancho Los Labradores offers free shuttle service to and from San Miguel for all residents of the development. This service allows you to forego the parking and congestion problems of the urban city, and uncomfortable night driving. Twice a week the service will include a trip to San Miguel's biggest supermarket and supply store "Gigante". Moreover, Rancho Los Labradores has included as part of the master plan, a commercial area where our residents will find first necessity articles and some special culinary items. This plaza includes seven commercial locales, including the convenience store, a cyber-coffee cafe, a veterinary office, a video rental shop, a small bookstore and a amphitheater for live presentations, music concerts and recitals. This way, Rancho Los Labradores will be not only the true geographical center but truly will be the heart of the "Golden Corridor", between the towns of Dolores and San Miguel de Allende.

Club House

The Club House at Rancho Los Labradores is not only a beautiful example of Mexican colonial architecture but also a complete amenities center with an ecological foundation. This three-story building was constructed using one of the most unique, thermal, and ecological building materials in the market – hay stacks.

Under one roof you will find: a Spa where you will have the opportunity to enjoy the pleasures of a massage, a facial, manicure or pedicure, or any other of our body treatments; a well-equipped gym with a Personal Trainer on site; a Mexican restaurant with a unique dining experience; a piano bar and snack bar; and a social area with pool, ping-pong, and foosball tables. Surrounding the Club House you will find outdoor activities: tennis, pool, a solar-powered family-size Jacuzzi, horse stables, archery, temazcal, and the workshop areas.

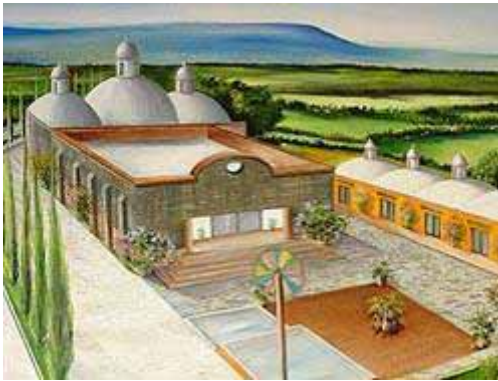

Los Labradores Club House is an ecological-oriented facility where rain water is collected for irrigation, gray waters are treated for the same purpose, and organic waste is treated and reused as compost. Rancho Los Labradores also collects and preserves all native cacti that surround the area.

Commercial Area

Very close to the Social Area of Rancho Los Labradores, you will find the Commercial Area. This area includes a Theater/Amphitheater for movies and outdoor live performances; and seven commercial sites such as: Cafeteria/Internet, Drugstore/Pharmacy, Convenience Store, Bookstore and Video store.
